GREEN, R.H.

Robert Geoffrey Hewett Green was born at Antill Ponds in 1925 and educated in Launceston. His interest in natural history dates from childhood and he worked on his pastoral property until 1961 when he moved to Launceston and was offered a job as an assistant in Zoology at the Queen Victoria Museum where he worked for many years, later becoming the Director. He was one of the first bird banders in Tasmania, but in recent years has worked more on mammals. The University of Tasmania honoured his work in zoology by the bestowal of an Honorary Doctorate.

John Liddy B.E., MSc was born in 1927 at Broken Hill NSW, and educated at BH Technical College, University of Adelaide and Griffith University. He worked in Tasmania for 3 periods, two on the West Coast and 1959-63 with the Mines Department in Launceston. His main interest is banding (he helped start it in Tasmania in 1960), and he aims to see 3000 species worldwide in his retirement.

SHARLAND, M.S.R.

Michael Sharland (1899-1987) was born in Hobart and started writing articles on birds for journals and newspapers from his early 20s. His column, signed "Peregrine" in the Hobart Mercury ran regularly for over 60 years. He lived in NSW for some years but returned to Hobart after the war and became secretary of the Scenery Preservation Board, and in 1949-51 was President of the RAOU. He was a photographer of note before color was universally used, and many of his black and white photos are found in books and magazines.
